STATE CLEARINGHOUSE

NEWSLETTER

July 16 through 31, 2001

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents, federal notices and federal grant applications received by the Clearinghouse during the period **July 16 through 31, 2001**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse.html#clearinghouse

Questions regarding federal grant notices should be directed to Sheila Brown.

Questions regarding processing of environmental documents should be directed to:

Katie Shulte and Karen Fowler (for projects in Northern California)
Scott Morgan and Brian Grattidge (for projects in Southern California)

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 222) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

Consider installing window coatings or double-paned windows.

CEQA & Planning Case Law

Summary of Recent CEQA & Planning Case Law

The following summaries of recent court cases relate to California Environmental Quality Act and/or Planning law.

CEQA Cases

Case Name (No.): *Apartment Association of Greater Los Angeles et al., v. City of Los Angeles* (B144335)

Court, Filing Date: Cal. App. 2nd/7, 07/23/2001

Source: 2001 Daily Journal D.A.R. 7617

Summary of Ruling: City's housing code enforcement program is exempt from environmental review under California Environmental Quality Act, therefore environmental impact report isn't required.

Planning Cases

Case Name (No.): *Dana K. Ferrell v. County of San Diego* (D034864)

Court, Filing Date: Cal. App. 4th/1, 07/09/2001

Source: 2001 DJ D.A.R. 7029

Summary of Ruling: Owner of property being taken or damaged by public entity has duty to take responsible steps to minimize loss.

Case Name (No.): *Santa Ana Unified School District v. Orange County Development Agency* (G027331)

Court, Filing Date: Cal. App. 4th/3, 06/29/2001

Source: 2001 DJ D.A.R. 6835

Summary of Ruling: School district entitled to property tax revenues despite failing to elect to receive funds prior to redevelopment project.

Case Name (No.): *Home Builders Association of Northern California v. City of Napa* (A0909437)

Court, Filing Date: Cal App., 1st/5, 06/06/2001

Source: 2001 DJ D.A.R. 5713

Summary of Ruling: Inclusionary housing ordinance applying to all development in City is not facially invalid and doesn't result in taking of residential developers' property.

Please be advised, the information contained in these summaries does not constitute legal advice, nor should the summaries be relied upon as a matter of law. Refer to the full text of the cases cited for the complete ruling and case facts.

Federal Notices

Intergovernmental Review Notices (July 15th – 31st, 2001)

The following are notices received by the State Clearinghouse from federal agencies in compliance with Executive Order 12372. If you would like more information about the subject matter, please contact the agency representative listed below

Agency: Federal Energy Regulatory Commission

Contact: N/A

Telephone: N/A

E-mail: N/A

Address: 888 First Street, NE, Washington, DC 20426

Description: The Commission has issued an order amending the recreation plan filed by the Nevada Irrigation District which proposed to amend its approved recreation plan by making enhancements and adding recreation facilities at the Yuba-Bear River Project (No. 2266). The project is located in the on the Middle and South Yuba rivers, Bear River, and Jackson and Canyon Creeks near Lake Tahoe about 50 miles northeast of Sacramento, California. The project is located within the Tahoe National Forest and consists of a series of dams, reservoirs, tunnels, pipelines, and powerhouses.

Comment By: N/A

Agency: Federal Energy Regulatory Commission

Contact: Dr. John M. Mudre

Telephone: (202) 219-1208

E-Mail: N/A

Address: 888 First Street, NE, Washington, DC 20426

Description: In a letter address to Dr. Rebecca Lent, the Commission has requested suspension of the preparation of a Biological Opinion on the original PVID/PG&E flow modification for the Potter Valley Project (No. 77-110). The Commission is requesting the suspension while they complete a review of the modified proposal to determine how it may affect the Commission's proposed agency action and whether further NEPA analysis is warranted.

Comment By: N/A

Agency: Federal Energy Regulatory Commission

Contact: Robert Bell

Telephone: (202) 219-2806

E-Mail: N/A

Address: 888 First Street, NE, Washington, DC 20426

Description: A hydroelectric application for a preliminary permit has been filed by Mr. Nicholas E. Josten for the West Valley A and B Project (No. 12053). The proposed project would be located on the South Fork Pit River and West Valley Reservoir, in Modoc County, California. The project would use U.S. Forest Service land within the Modoc National Forest and the Bureau of Land Management's West Valley Dam and Reservoir. The project would have an annual generation of 6.2 GWh that would be sold to a local utility.

Comment By: 60 days from the issuance date of this notice. (Issued July 6, 2001)

Agency: Federal Energy Regulatory Commission

Contact: John Mudre

Telephone: (202)219-1208

E-Mail: John.mudre@ferc.fed.us

Address: 888 First Street, NE, Washington, DC 20426

Description: Pacific Gas & Electric has filed a hydroelectric application for an Amendment to License Amendment Application for the Potter Valley Hydroelectric Project (No. 77-110). The project is located on the Eel River and East Fork Russian River, in Mendocino and Lake counties, California. The project is partially located within the Mendocino National Forest, on federal lands administered by the U.S. Forest Service.

Comment By: August 6, 2001

Agency: United States Department of Agriculture

Contact: David Morton

Telephone: (530) 283-7828

E-Mail: N/A

Address: 159 Lawrence Street, P.O. Box 11500, Quincy, CA 95971-6025

Description: The Soper-Wheeler Company and the United States is considering a land exchange under the authority of the General Exchange Act. The proposal is to exchange 2,846.05 acres of federal land for 5,799.51 acres of non-federal (private) land, affecting Yuba, Butte, Plumas, and Sierra counties.

Comment By: August 23, 2001

Agency: Federal Energy Regulatory Commission

Contact: Robert Bell

Telephone: (202) 219-2806

E-Mail: N/A

Address: 888 First Street, NE, Washington, DC 20426

Description: Mr. Richard V. Williamson has filed a hydroelectric application for a preliminary permit for the Middle and South Forks, Sacramento River Project (No. 12027). The proposed project is located on the Middle and South Forks, Sacramento River, in Siskiyou County, California. The project would use U.S Forest Service land within the Shasta-Trinity National Forest. The project would have an annual generation of 50.4 GWh that would be sold to a local utility.

Telephone: N/A

E-Mail: N/A

Address: 888 First Street, NE, Washington, DC 20426

Description: Southern California Edison Company (SCE), licensee for the Lee Vining Hydroelectric Project (No. 1388), filed an application to amend its license. The project is located on Lee Vining Creek in Mono County, California near the town of Lee Vining, within the Inyo National Forest. The Commission has approved SCE's application to amend the license in part for the Lee Vining Project as provided by an order issued on July 23, 2001.

Comment By: N/A

Agency: United States Department of Interior

Contact: Susan Wannebo

Telephone: (530) 257-0456

E-Mail: N/A

Address: Bureau of Land Management, Eagle Lake Field Office, 2950 Riverside Drive, Susanville, CA 96130

Description: The Bureau of Land Management has issues a Notice of Noncompetitive Sale of Public Land in Plumas County. The notice affects lands in Plumas County, California within T.23N., R.16E., Section 35, SWNW, M.D.M. These public lands will be offered for direct sale to the adjoining landowner, David Goss of the Pitchfork Cattle Company.

Comment By: 45 days from the date of publication of this notice in the Federal Register

Agency: Federal Energy Regulatory Commission

Contact: James Hunter

Telephone: (202) 219-2839

E-Mail: N/A

Address: 888 First Street, NE, Washington, DC 20426

Description: A hydroelectric application for a preliminary permit has been filed by David R. Croft for the Camptonville Pow-Our House project (No. 12054). The proposed project would utilize the existing Our House and Log Cabin Diversion Dams and Lohman and Camptonville Tunnels of Yuba County Water Agency's Yuba River Project No. 2246, on the Middle Fork Yuba River and Oregon Creek, and would locate two new developments on Willow Creek, within the Tahoe National Forest in Yuba and Sierra Counties, California. The project would have an annual generation of 39.5 GWh.

Agency: Federal Energy Regulatory Commission

Contact: Tim Looney

Telephone: (202) 219-2852

E-Mail: timothy.looney@ferc.fed.us

Address: 888 First Street, NE, Washington, DC 20426

Description: The Commission has issued a notice soliciting application for the San Geronio Nos. 1 and 2 Hydroelectric Project No. 344. The original license issued to the Southern California Edison Company (SCE) expires April 26, 2003. On April 24, 1998, SCE filed a notice of intent to file an application for a new license, however, they did not file an application for new license which was due by April 26, 2001. The project occupies lands of the United States within the San Bernardino National Forest.

Comment By: 60 days from the issuance date of this notice. (Issued July 3, 2001)

Agency: United States Department of the Interior National Parks Service

Contact: David A. Mihalic, Superintendent

Telephone: N/A Fax: (209) 372-0456

E-Mail: yose_planning@nps.gov

Address: Superintendent, Yosemite National Park, Attn.: Yosemite Falls Restroom Relocation, PO Box 577, Yosemite NP, CA 95389

Description: A program for the restoration and rehabilitation of the Yosemite Falls area was described and evaluated in the Yosemite Valley Plan and its Supplemental Environmental Impact Statement, which was approved in December 2000. Concerns raised by the American Indian Community have led the National Park Service (NPS) to reconsider the location of the restroom. The NPS is preparing an Environmental Assessment considering options for relocation of the restroom.

1996013005	SP-95-02 Pre-Zoning of the San Francisco Water Department Bernal Pleasanton, City of Pleasanton--Alameda The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement (2001-0143) pursuant to Section 1603 of the Fish and Game Code to the project applicant, Mike Harlan, Bernal Investment Company, LLC. The project consists of constructing two stormwater outfalls, cofferdams, and bank stabilization, all of which would be constructed in the Alameda County Flood Control and Water Conservation District (Zone 7) flood control channel B-2-1. The proposed outfalls would be associated with the construction of two detention basins on the northwest bank of the B-2-1 channel. The first outfall (North Outfall) would be located several hundred feet directly northeast of I-680. The second outfall (South Outfall) would be several hundred feet upstream of the confluence of Arroyo de la Laguna. The Augustine Knolls property is located in an undeveloped area south of the intersections of Bernal Avenue and I-680, in the City of Pleasanton, Alameda County, California on the USGS 7.5 Quadrangle Map for Dublin. The property is bisected by I-680; Bernal Avenue bounds the site on the north; Arroyo de la Laguna forms the southwest boundary; while the southeast boundary is marked by the B-2-1 flood control channel.	NOD	
1998092031	Bell Road Widening Placer County Auburn--Placer Proposal to widen Bell Road to provide 4 travel lanes between State Highway 49 and Interstate 80 plus shoulders and a median to accommodate left-turn lanes where needed.	NOD	
2000122096	Use Permit 99-29 Shasta County Shasta Lake--Shasta The proposal is for approval of a use permit to allow a 100-space recreational vehicle (RV) park with related facilities on an approximate 20-acre parcel.	NOD	
2001021100	Engineering Evaluation/Cost Analysis for Program Site 31, Vandenberg Air Force Base Toxic Substances Control, Department of Lompoc--Santa Barbara The proposed removal action at Site 31 entails relocating California red-legged frog, removal of surface water and sediment from retention basin and tank vault with appropriate disposal, and backfill with clean fill material and re-vegetation with natural grasses.	NOD

2001021109	Cannon Court-SDP 00-09/CUP 99-30/CUP 99-31/PUD 00-109/MS 99-16 Carlsbad, City of Carlsbad--San Diego Gas station/mini-mart, two restaurants, and an 86-room hotel on a vacant, pre-graded 6.5 acre site.	NOD	
2001051076	Tentative Tract Map 53114 - McGrath School Project Santa Clarita, City of Santa Clarita--Los Angeles The proposal includes the development of 53 single-family residential lots, a public elementary school, and Phase II of a self storage facility.	NOD	
2001051101	Office Building #80 Project California State University Trustees Long Beach--Los Angeles The proposed project involves the construction of a 6,000 sf building within a developed area of the University's Corporation Yard. The building would house approximately 25-30 staff offices for approximately 25-30 individuals.	NOD	
2001051121	East Highlands Ranch Water Facilities Improvements at Planning Areas 27 and 32 East Valley Water District Highland--San Bernardino S-P East Highlands, LLC is proposing to construct a domestic water storage reservoir, pump station, and hydropneumatic pump station to service its East Highlands Ranch (EHR) development. EHR is provided water service by East Valley Water District (EVWD). EVWD will participate in the construction of the reservoir and when the facilities are installed, own and operate the system.	NOD	
2001051132	Inland Empire Utilities Agency On-Site Dairy Digester/Chino I Desalter Power Generation Pilot Scale Projects Inland Empire Utilities Agency Chino--San Bernardino The Inland Empire Utilities Agency (IEUA or Agency) is proposing to install, operate and maintain pilot scale digester facilities that are intended to provide a clean, renewable source of methane gas (biogas) as a substitute for natural gas fuel to power back-up power generation facilities (1,750 kilowatts (kW)) that are in the process of being installed at the Chino 1 Desalter. The maximum-sized project that will be considered for approval by the IEUA Board of Directors will produce enough digester biogas to generate 1.75 megawatts (mW) of electricity. This project will be phased, with a first phase digester process estimated to produce enough digester biogas to generate up to 0.5 megawatts of electricity for use at the Chino 1 Desalter or other generators connected to the digester gas distribution system. This digester pilot project is referred to herein as the "Synagro Digester".	NOD	
2001052134	Fairhaven Restoration Project Humboldt Bay Harbor --Humboldt Project involves removing outdated intertidal and subtidal structures, site restoration and piling removal and replacement.	NOD

2001078311	"Willmax" 32 D (030-18899) Conservation, Department of --Kern Drill a development well within the administrative boundaries of an oil and gas field. The well will be compatible with existing land use.	NOE	
2001078312	"Lockwood" 62 B (030-18901) Conservation, Department of --Kern Drill a development well within the administrative boundaries of an oil and gas field. The well will be compatible with existing land use.	NOE	
2001078313	Chip Seal Road - Gate 4 to District Office Parks and Recreation, Department of --San Luis Obispo This project will chip seal and re-stripe the existing main road for the Castle Hilltop at Hearst San Simeon State Historic Monument. Work will remain within existing footprint and no excavation is necessary.	NOE	
2001078314	Waterproof and Restore Lower 'A' House - Casa del Mar Parks and Recreation, Department of --San Luis Obispo Restore lowest floor bedrooms, lobby, and bathrooms of 'A' House at Hearst San Simeon State Historic Monument. Install a waterproof rubber membrane under tiles of north side stairs and deck to provide moisture protection to rooms prior to restoration. Rooms will be restored to their original historic appearance, except for the lobby ceiling (design information insufficient for restoration). Materials will be repaired to restored, preserving/replicating original finishers, or replaced in kind. Electrical system will be rewired; missing or damaged fixtures (both electrical and plumbing) will be replaced with accurate replicas or fixtures of appropriate period design. All work will be performed in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties.	NOE

<u>Documents Received on Monday, July 16, 2001</u>			
2001078315	<p>Washburn Sewer Line Replacement Parks and Recreation, Department of --San Luis Obispo</p> <p>Replace the existing temporary Washburn sewer line and lift station 2 at San Simeon State Park with a permanent sewer line and lift station. Both the existing temporary facilities and new facilities replace a failed sewer line that has been abandoned in place. All work will take place within the Caltrans right-of-way or previously disturbed site of existing temporary facility; new line could not follow path of original facility located in an environmentally sensitive wetlands area. Excavated material will be kept in place with silt fencing to prevent inadvertent impacts to adjacent wetlands and migration of excavated soil off-site. Construction fencing will also be placed around areas containing Compact Cobwebby Thistle and construction will not take place during swallow nesting season. A DPR archeologist will be on-site to monitor excavation of south 1/3 of trenching path and lift station site, due to proximity of archeological sites containing human remains.</p>	NOE	
2001078316	<p>Hilltop Gold Leafing - Interior of Houses 'A', 'B', and 'C' Parks and Recreation, Department of --San Luis Obispo</p> <p>Repair gold-leafed and painted trim throughout interior of 'A', 'B', and 'C' Houses. Make minor repairs to plaster castings used for door castings, baseboards, and window trims. All repair work will use in kind or similar materials and will match surrounding historic fabric in color and texture. Photographic documentation of damaged surfaces will be completed prior to repair.</p>	NOE	
2001078317	<p>Walkway Repair - North and East Sides of the North Wing (La Casa Grande) Parks and Recreation, Department of --San Luis Obispo</p> <p>Project will remove and replace the worn, uneven existing asphalt walkway and correct drainage problems at the north and east sides of the North Wing (La Casa Grande) of Hearst San Simeon State Historic Monument. A more aesthetically appropriate concrete that is compatible with, but distinct from, adjacent historic concrete, will replace the existing asphalt. A rainwater drainage system will be incorporated into the walkway design. The walkway is non-historic and work will not impact historic resources. All work will take place within the existing footprint or in adjacent, previously disturbed areas.</p>	NOE	
2001078318	<p>Historic Hilltop Landscape Management Plan Parks and Recreation, Department of --San Luis Obispo</p> <p>The project will develop guidelines for the restoration of historical landscaping (circa 1919-1951) at the Hilltop area of Hearst San Simeon State Historic Monument. All decisions will be based on recommendations of the Historic Landscape Committee and the Secretary of the Interior's Standards for the Treatment of Historic Properties. Plan must provide for means to contain non-native species. Planting selections must be approved by DPR resource ecologist.</p>	NOE

<u>Documents Received on Monday, July 16, 2001</u>			
2001078319	Powerhouse Rain Gutters Parks and Recreation, Department of Folsom--Sacramento Replace rain gutters on the main powerhouse building at Folsom Powerhouse State Historic Park. Gutters will be replaced in kind (same material and dimensions) and structure will be photographically documented before, during, and after construction.	NOE	
2001078320	Repair Sash and Frames - Roman Pool Parks and Recreation, Department of --San Luis Obispo Project will refinish steel window frames (circa 1930) in the lower pool level of the Roman Pool building at Hearst San Simeon State Historic Monument. Chemical stripping will abate existing lead paint, rust will be removed, and window frames repainted to match historic grey color identified on similar archived window frames. Existing paint/finish is not historic. Glazing will be removed during stripping process and then replaced. Refinishing is needed to arrest rust and deterioration of windows.	NOE	
2001078321	Cole Creek Dredging Parks and Recreation, Department of Clearlake--Lake Dredge the Cole Creek Channel at Clear Lake State Park to maintain boat access to ramp and docks. Material will be removed by a clam-shell dredge from an area beginning just downstream of the Cole Creek footbridge, adjacent the boat ramp/docks, and extending 1000 feet long by 50 feet wide into the lake. This portion of the channel requires dredging approximately every 20 years to maintain accessibility; the last dredging occurred in the late 1980s. No dredging will occur within 10 feet of the bank vegetation to protect existing tules and bulrush along banks. Dredged spoils will be deposited and dried in the grassy, open part of the day use area, then removed from park for disposal. There were no detectable levels of metals and organochlorine pesticides in soil borings from the area to be dredged. All spoils will be handled in accordance with hydrilla control requirements and drying area will be revegetated with local natural seed mix and native species as required. Work will not begin until after June 15th to avoid migration and spawning season of the Clear Lake Hitch. A DPR ecologist will be on-site during the first week of the project to monitor work for environmental compliance.	NOE	
2001078322	Replace Combination Building - Madrone Campground Parks and Recreation, Department of --Marin Replace existing combination building in Madrone Campground at Samuel P. Taylor State Park with a slightly larger, ADA compliant Series 200 Combination Building (restrooms and showers). Existing building will be demolished and new structure constructed on the same site, encompassing the original footprint. Excavation will be limited to perimeter of new foundation and adjoining walkway (depth not to exceed 16 inches). Structure will be serviced by existing utilities. Portable toilets (number sufficient to provide equivalent capacity for campground use) will be provided during construction and placed in adjacent parking area. Existing building will be documented prior to demolition.	NOE

2001078323	ADA Retrofit - Le Sage Restrooms Parks and Recreation, Department of Pismo Beach--San Luis Obispo Reconstruct existing restrooms, entry, and parking lot at Le Sage Golf Course Concession at Pismo State Beach to meet ADA standards. Repair/repave access and parking area; restripe. All work will occur within the footprint of the existing structure and entry/parking area.	NOE	
2001078324	ADA Retrofit Restrooms - Riveria Restaurant Parks and Recreation, Department of Pismo Beach--San Luis Obispo Reconstruct existing restrooms, entry, and parking lot at Riveria Restaurant Concession at Pismo State Beach to meet ADA standards. Repair/repave access and parking area; restripe. All work will occur within the footprint of the existing structure and entry/parking area.	NOE	
2001078325	Replace 2 Restrooms - Oceano Campground Parks and Recreation, Department of Pismo Beach--San Luis Obispo Replace two existing restrooms at Riveria Restaurant Concession at Pismo State Beach. Install ADA compliant drinking fountains adjacent to restrooms. Install accessible walkways from parking area to restrooms. Restripe adjacent parking area to ADA standards. Existing structures will be demolished and replaced with combination restroom/shower buildings, compatible with existing park design. All work will occur within the footprint of the existing structures and adjacent, previously disturbed areas.	NOE	
2001078326	Upgrade Security System - Hilltop, Visitor Center, and Gates 2, 4, and 5 Parks and Recreation, Department of --San Luis Obispo Project will upgrade security system for the Hilltop compound, Visitor Center, and Gates 2, 4, and 5 at Hearst San Simeon State Historic Monument to improve performance and reliability of security infrastructure. Install fiber optic cable and upgrade system components and software, including replacement of access control system at gates. Replace/install cabling in existing or additional conduit in utility corridors as necessary. A DPR resource specialist will monitor all excavation and work in bat habitat will be suspended during breeding seasons (generally April-September). Routing of cable and auxillary connections may be altered during construction to avoid or minimize impact to historic fabric.	NOE	
2001078327	Alien Species Control - Coastal Scrub Plant Community Parks and Recreation, Department of --San Luis Obispo This project will eradicate non-native thistle currently infringing on the native plant community at San Simeon State Park. Herbicide (Round-up Pro) will be selectively applied to kill non-native vegetation (primarily thistle); native plant species will be allowed to revegetate naturally. Application of Herbicide to plants growing on archeological site will not damage the resource and soil will not be disturbed.	NOE

<u>Documents Received on Monday, July 16, 2001</u>			
2001078328	Leffingwell Parking Lot Repair Parks and Recreation, Department of --San Luis Obispo Repair and repave Leffingwell Parking Lot at San Simeon State Park. Install petro mat and overlay existing asphalt. Work will be confined to existing footprint.	NOE	
2001078329	Teakwood Restoration -Casa Grande Parks and Recreation, Department of --San Luis Obispo Project will refinish existing teakwood band around exterior of Casa Grande at Hearst San Simeon State Historic Monument. Solid body stain and semi-transparent oil stains will be applied to protect teakwood from moisture and ultra violet light. Finished teakwood will differ slightly from historic appearance, but application is necessary to preserve resource. Oil stain is reversible and will cause no permanent alteration to the historic fabric. All work will be done in accordance with the Secretary of the Interior's Standards for the Treatment of Historic Properties.	NOE	
2001078330	Repair Drainage Systems - Roman Pool Bus Loading Area and Rain Gauge Hill Parks and Recreation, Department of --San Luis Obispo Reconstruct drainage systems at the Roman Pool Bus Loading Area and Rain Gauge Hill at Hearst San Simeon State Historic Monument to redirect rainwater, control erosion, and improve visitor safety. Replace existing drains and install additional drains, catch basins, rip rap, and culverts as necessary. All work will occur within footprint of existing systems and adjacent previously disturbed area. A Department of Parks and Recreation (DPR) archeologist/historian will monitor all excavations. New Design will require two historic portland concrete cement graded catch basins and drains to be abandoned in place. Prior to start of work, construction and appearance of basins will be thoroughly documented by a DPR archeologist. Catch basins will be completely cleaned, filled with a removable substance (e.g., decomposed granite) that will stabilize the resource, and covered. Grates will be removed and stored to protect further deterioration. All work associated with an historic resource will be conducted in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties.	NOE	
2001078331	Repave Bus Parking Area - Visitor Center Parks and Recreation, Department of --San Luis Obispo Project will repave existing bus parking area at the Visitor Center at Hearst San Simeon State Historic Monument. Asphalt will be removed as necessary to eliminate soft spots, petro mat installed, and area repaved and re-striped. All work will take place within the existing footprint and there will be no expansion of paved area.	NOE	
2001078332	Repair Pier Railings/Provide ADA Access Parks and Recreation, Department of --San Luis Obispo This project will replace worn and weathered lumber in the railings of the pier at William Randolph Hearst State Beach and retrofit pier for ADA access. Pier has historical significance and will probably be eligible for California Registry within two years. Therefore, structure is considered a significant cultural resource and	NOE

<u>Documents Received on Monday, July 16, 2001</u>			
	repairs will be completed in accordance with the Secretary of the Interior's Standards for the Treatment of Historic Properties. All materials, with the exception of the ADA retrofit, will be replaced in kind. All ADA retrofill work will be reversible, with minimal impact on the pier's historic fabric.		
2001078333	Rehabilitate Dressing Rooms - Roman Pool Parks and Recreation, Department of --San Luis Obispo Rehabilitate dressing rooms adjoining wading section of Roman Pool at Hearst San Simeon State Historic Monument. Treat concrete walls and ceiling and repair/replace cork tiles. Repair/upgrade electrical system to code; replace hidden conduit as necessary. Patch/repair plaster wall surfaces; remove all non-historic attachments. Clean all areas and repaint walls and trim in original historic colors. Reroute smoke detectors to conceal system from view. Historic fabric will be replaced in kind. Labeled drawings and written project documents will document historic paint colors. Photographs/records will document appearance and condition of wall surfaces and room fixtures. Although structure has served as a nocturnal bat roost in the past, there is no indication bats are currently present. Area will be investigated prior to start of work and, if evidence of active bat habitation is found, bats will be excluded or work will be timed to avoid impacts.	NOE	
2001078334	Rehabilitate Drainage System - Elephant Hill Parks and Recreation, Department of --San Luis Obispo Rehabilitate existing drainage system for Elephant Hill perimeter dirt road at Hearst San Simeon State Historic Monument. Install PCC swale and three graded PCC catch basins in the western-most portion of Elephant Hill. Also, install an additional swale between existing electrical shed and loading docks and graded PCC catch basin, to drain into existing catch basin on inside road shoulder. Rip rap will be placed directly below CMP spill point to deter erosion during periods of heavy rain. All work will occur within existing footprint of road easement or previously disturbed areas adjacent to road. Two concrete masses lie in path of uppermost swale and may be remnants of tanks or pools used by Hearst's exotic animals. Excavation around structures will occur by hand until identification is possible. A DPR archeologist will be present during excavation. If masses are an indication of a larger, subsurface feature, work will be halted until discovery can be documented and historic significance, if any, determined. Work will not resume in this area until documentation and any other preservation efforts, if any, are completed. All work will occur in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties.	NOE	
2001078335	Oak Replacement - Historic Hilltop Garden Parks and Recreation, Department of --San Luis Obispo Replace Coastal Live Oak trees (quercus agrifolia) that were historically present in the formal gardens (Hilltop Gardens) of La Cuesta Encantada at Hearst San Simeon State Historic Monument. Small oaks transplanted from other locations on the property or grown from acorns collected from existing trees will be used to replace trees that were removed following death or disease. Six non-historic trees (planted in locations of original oaks) will be removed to allow replacement of historic oaks. Acorns will be propagated on-site to avoid Sudden Oak Death	NOE

	Syndrome transmittal. All work will be conducted in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties.		
2001078336	Repair Glass Tile Decking - Roman Pool Parks and Recreation, Department of --San Luis Obispo Replace damaged tile mosaics of Roman Pool decking at Hearst San Simeon State Historic Monument. Mosaics will be replaced exactly as original, with glass and gold tile replaced in kind. Use of templates is required. Polymer modified mortar will be used in place of original adhesive to provide superior bonding with subbase and improve durability in high traffic visitor areas. Original condition of repaired areas will be documented with photographs and identified on an as-built plan. All work will be conducted in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties.	NOE	
2001078337	Chipseal Visitor Center Loop Road Parks and Recreation, Department of --San Luis Obispo Chipseal Visitor Center loop road at Hearst San Simeon State Historic Monument. Road extends from Highway 1 into the Visitor Center parking lot and along the west access road to the entrance station/kiosk at the Ranger's Office. This is an overlay within the existing footprint of the road with no excavation or changes to drainage patterns.	NOE	
2001078338	Replace Drip Irrigation Lines - Visitor Center Parks and Recreation, Department of --San Luis Obispo Replace existing drip irrigation lines in Visitor Center parking lot at Hearst San Simeon State Historic Monument, to allow effective, reliable irrigation, especially during drought, and to support new replacement trees and vegetation. Trenches (4-6 inches deep) will follow existing irrigation lines, in previously disturbed areas.	NOE	
2001078339	Upgrade Visitor Center Docent Information Counter Parks and Recreation, Department of --San Luis Obispo Upgrade existing docent information counter in the Visitor Center at Hearst San Simeon Historic Monument to meet ADA requirements. New unit will incorporate counter heights and exhibit areas that are ADA accessible.	NOE	
2001078340	Repair Courtyard Tiles - "B" House Parks and Recreation, Department of --San Luis Obispo Remove and replace damaged paved tiles in courtyard at rear entrance to "B" House at Hearst San Simeon State Historic Monument. Replacement tiles will match originals in kind, with special care taken to match adjacent original tiles in color, size, and texture. Glazed tile inserts will be reused and reinstalled in their original design. Original layout and design tiled surface will be fully documented and duplicated by new installation. All work will be performed in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties.	NOE

<u>Documents Received on Monday, July 16, 2001</u>			
2001078341	<p>Rehabilitate Tile Decking - David Fountain Parks and Recreation, Department of --San Luis Obispo</p> <p>Rehabilitate the tile deck area adjacent to the "David" fountain, located between "C" Terrace and "C" House at Hearst San Simeon State Historic Monument. Remove historic and non-historic tile, stabilize concrete subdeck, and retile area in the original herringbone pattern, with in-kind paver tiles that match original tiles in color and surface texture. A control joint will be added to minimize possibility of cracks due to movement of subdeck; joint will be incorporated into the design and will not alter original pattern. All work will be conducted in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties.</p>	NOE	
2001078342	<p>Riparian Plant Community Maintenance - Santa Rosa Creek Parks and Recreation, Department of --San Luis Obispo</p> <p>Maintain riparian community along Santa Rosa Creek and its tributaries at San Simeon State Park by removing 2.8 acres of cape ivy. Application of herbicide (Round-Up) and physical removal of offending plants will be used in areas of non-surface water. Removal of invasive, non-native cape ivy will allow natural re-establishment of native components of riparian plant community.</p>	NOE	
2001078344	<p>Repave Bus Loading and Turnaround Area - Visitor Center Parks and Recreation, Department of --San Luis Obispo</p> <p>Project will repave existing bus loading and turnaround area at the Visitor Center at Hearst San Simeon State Historic Monument. Asphalt will be removed as necessary to eliminate soft spots, petro mat installed, and area repaved and re-striped. All work will take place within existing footprint and there will be no expansion of paved area.</p>	NOE	
2001078345	<p>Laguna Creek House Construction Fish & Game #3 Moraga--Contra Costa</p> <p>The project is the construction of a single-family residence and associated structures near Laguna Creek in the Town of Moraga, Contra Costa County. A single-family residence and a garage and carport will be constructed on one side of Laguna Creek, and a workshop will be constructed on the other side. All structures are approximately a minimum of 30 feet from Laguna Creek and will need construction activities to occur just below top of bank. Some grading and excavation for pier replacement will occur on the upper banks of Laguna Creek. Most of the area has been previously leveled for building construction. The project will require cutting of one large willow for the garage and carport construction and a number of trunks of a multiple-trunked oak for construction of the residence. A few smaller trees, less than three inches dbh, may need to be cut or removed. A number of branches will need to be trimmed on other trees. The project will remain on the upper banks of Laguna Creek and will not affect the stream course, water flow, or sedimentation to the creek. No bridge is proposed for construction as part of this project. Issuance of Streambed Alteration Agreement Number R3-2001-0157 pursuant to Fish and Game Code Section 1603.</p>	NOE

<u>Documents Received on Monday, July 16, 2001</u>			
2001078346	<p>Arroyo Mocho Creek Bank Stabilization Fish & Game #3 Livermore--Alameda</p> <p>A concrete low-flow crossing exists immediately upstream from the project site and crosses the stream at an angle. High flows during 1997, combined with the angular low-flow crossing, combined to form a lateral scour that is threatening the north bank of the applicant's property. The proposed project would place Class 4 rock slope protection (RSP) along the north bank of the applicant's property to protect the bank from erosion during high flows. Approximately 75 to 80 feet of the bank would be graded to accommodate the RSP. Material removed from the bank would be backfilled in the spaces among the RSP, and the site would be revegetated using willow cuttings. A backhoe or similar equipment would be used for construction and would operate from the bank above the project site. The project is necessary to minimize or prevent erosion from occurring during future high flow events. Issuance of a Streambed Alteration Agreement Number R3-2001-0360 pursuant to Fish and Game Code Section 1603.</p>	NOE	
2001078347	<p>Stags Leap Bridge Installation Fish & Game #3 Napa--Napa</p> <p>This project consists of installing a railroad car deck for a bridge crossing. The bridge abutments will be out of the creek and on the top of the bank. Natural rock rip-rap will be placed on the creek banks in the area of the bridge abutments and extend down to the bottom the creek. The bridge abutments are approximately 28 feet long and eight feet wide. Approximately 1,800 cubic feet of rip-rap will be used to prevent erosion to the abutments. Work will be done during the summer months when the creek is dry. All bare areas will be reseeded with native seed after construction is completed and before the rainy season. Revegetation mitigation for the placed rip-rap will be within the general vicinity of the bridge. Silt fences will be placed on top of the creek banks before construction begins to prevent silt from entering the creek. All work will be from the top of bank. No equipment will be used in the creek. Issuance of a Streambed Alteration Agreement Number R3-2001-0200 pursuant to Fish and Game Code Section 1603.</p>	NOE	
2001078348	<p>Circle Oaks Sewer Line Repair Fish & Game #3 Napa--Napa</p> <p>A 10 inch sewer main is damaged at the Circle Oaks neighborhood. Through video camera inspection, a problem was identified in a section of piping. Estimated footage of the damage is 10 to 20 feet. Due to the depth of the piping system, a backhoe will need to be used. The operator will need to remove 15-20 square feet of blackberries to access the site. Banks will be restored back to natural slopes and reseeded and replanted with native seed and willow stakes. Two mid-sized willows will have to be removed to access the pipe. These will be replanted at a three to one ratio with local willow. Issuance of a Streambed Alteration Agreement Number R3-2001-0382 pursuant to Fish and Game Code Section 1601.</p>	NOE

<u>Documents Received on Tuesday, July 17, 2001</u>			
2000062155	Northeast Stockton High School Stockton Unified School District Stockton--San Joaquin Development of new high school campus including 200,000 square feet of structures, outdoor sports facilities and other site improvements.	EIR	08/30/2001
2001062066	Draft Amendments to Rule 2.14, Architectural Coatings Yolo-Solano Air Quality Management District Dixon, Rio Vista, Vacaville--Solano, Yolo The proposed project is to incorporate the volatile organic compound (VOC) limits and other requirements set by the Air Resources Board for the Suggested Control Measure for Architectural Coatings. The ARB SCM was adopted in May 2000.	EIR	08/30/2001
2001071090	Kern County Juvenile Treatment Facility Kern County --Kern The project consists of design and construction of a 200 bed juvenile detention facility. At full build-out, the facility will consist of eight (8) buildings within a campus-style layout. All activities of the juveniles will be restricted to the 15.85 acre parcel, and a 12 foot chain link security fence is to be installed around the perimeter of the site. At full build-out, the facility will consist of: one 15,430 square foot administration building; one 8,678 square foot kitchen/laundry/dining/warehouse building; one 10,890 square foot education building; and five 11,877 square foot detention housing pods (each pod containing 40 beds). Approximately 80 employees will staff the facility, which will operate 24 hours per day, seven days per week. The maximum shift will be the daytime and will be composed of counselors, support staff, medical staff and teaching staff. The purpose of the project is to alleviate overcrowding of existing County juvenile facilities and programs by increasing the number of treatment beds available to juvenile offenders.	JD	08/15/2001
1999091107	Pipefitters/Sunset Pointe San Diego, City of San Diego--San Diego The projects propose to subdivide 223.11 acres into 235 lots, construct 211 single-family residences on approximately 54.5 acres, and retain the remaining approximately 168.61 acres as open space on two separate but contiguous projects. The Pipefitters project, previously initiated under Notice of Preparation (NOP) No. 99-0639, would subdivide a 185.79 acre property into 203 lots comprised of 179 lots for single-family residential development and 24 lots totaling 140 acres to be preserved as open space. The Sunset Pointe project (LDR No. 40-0329) would subdivide a 37.32 acre site into 32 lots comprised of 28 single-family residences, 3 brush management lots, and a 28.6 acre open space lot to be dedicated to the MHPA.	NOP	08/15/2001
2001071086	621 East Colorado Boulevard Pasadena, City of Pasadena--Los Angeles The applicant proposes to retain the existing seven-story bank building and the retail frontage of the parking structure. The remaining two commercial buildings and parking structure will be demolished and replaced with 4 residential/commercial buildings and 3 levels of underground parking, with a total	NOP	08/15/2001

	of 304 residential units, 13,536 sf of retail/restaurant use, and 1,350 parking spaces. The retail frontage of the parking structure will be converted to a leasing office and recreation facilities for the residential tenants. Access to subterranean parking will be provided from North El Molino Avenue and East Union Street, while loading access will be provided from North Madison Avenue and North El Molino Avenue.		
2001071087	Northrop Grumman Corporation - Molasses Solution Injection Pilot Test Regional Water Quality Control Board-Los Angeles --Ventura The project involves injection of molasses solution into the groundwater to mitigate the high concentrations of chlorinated volatile organic compound constituents in the groundwater to meet the water quality objectives.	Neg	08/15/2001
2001071088	Dominguez Drain and Pump Station Los Angeles County Department of Public Works Carson--Los Angeles The proposed storm drain consists of approximately 2,330 linear feet of reinforced concrete pipe varying in size from 24 to 60 inches in diameter. The pipeline will run along Dominguez Street and Jamison Avenue and outlet into the lower reach of existing Project 1232. Project 1232 is a rectangular concrete channel at the location of the project. The proposed pump station will be built in a vacant lot near the terminus of Torrance Boulevard at Jamison Avenue. The purpose of the project is to alleviate flooding along the project alignment. During construction, the contractor will be required to follow the standard specifications of Los Angeles County Public Works pertaining to project site maintenance and construction activities.	Neg	08/15/2001

2001078364	Southern Spillgate Structure - Los Angeles Aqueduct, Southern Inyo County, California Los Angeles, City of --Inyo The southern spillage (turnout structure and associated conveyance pipe), a reinforced concrete structure and associated 60-inch, steel conveyance pipe that extends approximately 100 feet east, will be constructed to deliver water to the south zonal mainline component of the Southern Zones Dust Control Project, part of the Owens Lake Dust Mitigation Program (EIR certified in 1997). The turnout structure at the aqueduct will be up to 45 feet long, 30 feet wide, and up to 20 feet deep. From the associated conveyance pipe, the south zonal mainline will consist of a 60-inch, steel pipeline from the spillgate structure to the Southern Zones Dust Control Project boundary on the Owens Dry Lake playa.	NOE	
2001078365	Agreement R4-2001-0032; Maintenance of Hetch Hetchy Trash Racks Fish & Game #4 --Tuolumne The Operator will remove fine sediment, gravels, and debris deposited in the project locations by previous year flows. This annual mainenance will be completed between the months of September through November to ensure proper operation of existing trash racks and reservoir bypass conduits.	NOE

2001078366	Addition of Baseball Scoreboard San Juan Unified School District --Sacramento Install an 18-foot electrical scoreboard at the northern portion of the ball field.	NOE	
2001078367	Little Butte Creek and Honey Run Creek Blackberry Control Fish & Game #2 --Butte Streambed Alteration Agreement Number R2-2001-153 pertains to the removal of non-native Himalayan Blackberry along Little Butte Creek from 0.5 mile above Honey Run Creek to 0.5 mile below Honey Run Creek. Heavy equipment will be used to clear berry vines from the flood plain, pulling them away from the stream bank. A temporary stream crossing will be installed to allow heavy equipment access to the west side of the creek. Following eradication, native riparian vegetation and conifers will be planted in the project area.	NOE	
2001078368	Bank Stabilization Along Redwood Creek Fish & Game #3 Napa--Napa The operator proposes to stabilize 80 linear feet of a failing gabion structure along Redwood Creek at 22 Queens Court in Napa. The project consists of dewatering the stream, digging a trench along the base of the wall, and filling the trench and empty gabions with concrete ("shot-crete") and reinforcing steel mesh. The new concrete facing of the gabion wall will only extend up to the top of the second row of baskets and will protrude out into the stream six to twelve inches. The trench to hold the foot of this concrete facing will be at least one foot wide and at least one foot below the base of the bottom row of baskets. The concrete will be pumped to the site and a commercial sealant will be applied. All work will be done by hand. Issuance of a Streambed Alteration Agreement Number R3-2001-0246 pursuant to Fish and Game Code Section 1603.	NOE	
2001078369	Stone Bridge Cellar's, Inc. Revegetation Fish & Game #3 Napa--Napa This proposal is the result of a road construction contractor casting soil, cobbles, and large rocks down the bank of this drainage during road construction. This action resulted in damage to existing vegetation. In addition, rock check dams were installed in the creek bed to slow flow and reduce erosion. The above actions occurred without notification to the California Department of Fish and Game (DFG) and the case was referred to the Napa County District Attorney's Office for further action. This proposal is a result of the referral and was completed with review by DFG personnel. Issuance of a Streambed Alteration Agreement Number R3-2001-0333 pursuant to the Fish and Game Code Section 1603.	NOE	
2001078370	Mountain Cemetery Expansion Sonoma County Sonoma--Sonoma A proposal by the City of Sonoma to acquire an unused portion of the County-owned Veterans' Building property for the purpose of expanding the Mountain Cemetery.	NOE

2001078377	Update Reservoir Management Plan Parks and Recreation, Department of --Santa Clara Update existing Reservoir Management Plan (1985) for Henry W. Coe State Park. Plan will address safety and stability, erosion potential, maintenance needs, resident amphibians and reptiles, and an assessment of the benefits/detriment of fish species. It will include on-site inspection of all ponds and reservoirs (including those acquired since 1985) to evaluate current condition and suitability of previously recommended actions.	NOE	
2001078379	Replace Sewer Line - North Garrison Parks and Recreation, Department of --Marin Replace existing sewer line to North Garrison at Angel Island State Historic Monument. Reroute line to avoid problems associated with current dry wash replacement. Where line must pass under historic concrete roadway, pass new sewer line through sleeve under roadway, if available. Otherwise, concrete will be cut, removed, and set aside. A 12-inch steel sleeve pipe will be inserted to prevent need for future disturbance. Historic Concrete will then be mortared back into place. New sewer line will be threaded through steel sleeve. All other trenching will occur in heavily disturbed areas. An underground radar survey failed to locate any notable archeological items along the new route. Site must be photographed before, during, and after construction. If any subsurface cultural resources are encountered, work will stop until the find can be evaluated by a Department of Parks and Recreation archeologist and project altered, if necessary, to protect the resource.	NOE	
2001078380	Replace Sewer Lines - West Garrison Parks and Recreation, Department of --Marin Replace existing sewer line from just east of Quarters #11 to Bay outlet (West Garrison area) at Angel Island State Park. Cap and abandon existing concrete conduit in place under Quarters #11. Install a new line under Quarters via an existing opening and tie into new mainline. No alteration of historic fabric will occur and only a few PVC pipehangers will be attached in the basement of the structure to hold the pipeline true. Once completed, only the required sewer cleanouts will be visible in the historic landscape. All other trenching will occur in heavily disturbed areas. An underground radar survey failed to locate any notable archeological items along the new route. Site must be photographed before, during, and after construction. If any subsurface cultural resources are encountered, work will stop until the find can be evaluated by a Department of Parks and Recreation archeologist and project altered, if necessary, to protect the resource.	NOE	
2001078381	Percolation Testing - Leach Field Parks and Recreation, Department of --Marin Test existing leach field at Marconi Conference Center to determine adequacy for upgrade of wastewater treatment facilities. Trenching for tests will only have a minor impact on mostly non-native grassland and non-indigenous Monterey Pines. All soil removed during trenching will be replaced.	NOE

2001078396	<p>Mud and Silt Dredging Project Fish & Game #3 --San Luis Obispo</p> <p>The project consists of dredging mud and silt from approximately 3300 feet of the creek. This is a yearly maintenance project that has to be done due to agricultural runoff from upstream farms. The dredged mud and silt will be taken off site or deposited onto existing farm fields. The creek has been channelized for over 40 years and the entire valley through which the creek flows has been in continuous cultivation during this time period. These conditions have resulted in creek siltation with fine particulates which is the primary constituent of the streambed. Even after dredging, the composition of the streambed will not change. If dredging does not occur, both Little Oso Flaco Creek and Oso Flaco Lake will silt in. This would result in the loss of highly significant wildlife resources. This project will ensure that flow characteristics remain constant in the creek. Issuance of a Streambed Alteration Agreement Number R3-2000-1118 pursuant to Fish and Game Code Section 1603.</p>	NOE	
2001078397	<p>Bridge Over West Fork of Grayson Creek Fish & Game #3 Lafayette--Contra Costa</p> <p>As part of the development of a 9 acre parcel, into one single family home, the operator proposes to install a bridge over the west fork of Grayson Creek and fill a portion of the northern side tributary, at 1755 Reliez Valley Road in Lafayette, Contra Costa County. The bridge will be a clear span bridge 12 feet wide by 50 feet long. It will be anchored to abutments located approximately 5 feet from the top of the banks. No work or structures will impact the bed or banks of the west fork, which flows parallel to Reliez Valley Road. Issuance of a Streambed Alteration Agreement Number R3-2001-0341 pursuant to Fish and Game Code Section 1603.</p>	NOE	
2001078399	<p>Conway Well Health Services, Department of Paradise--Butte</p> <p>The project will add an existing well to the water supply system to prevent water shortages. The well has been refurbished with a new pump, new controls, new headworks, new concrete slab, and new fencing. A 50-foot pipeline was constructed to connect the well to the water system.</p>	NOE	
2001078400	<p>Office Lease California State Lands Commission Long Beach--Orange</p> <p>The California State Lands Commission proposes to lease approximately 14,900 square feet of administrative office space in an existing building. The office will accommodate approximately 50 employees of the Marine Facilities Division on the 9th Floor. This division receives a minimal amount of clients/visitors each week and onsite parking is adequate for staff and guests.</p>	NOE

2001071101	<p>Kenneth Hahn State Recreation Area General Plan Update Parks and Recreation, Department of --Los Angeles</p> <p>The General Plan for the Kenneth Hahn (formerly Baldwin Hills) State Recreation Area is designed to provide long-term guidance for resource management and development of facilities to support existing or potential recreational opportunities afforded by the park. In addition, the Plan addresses operational issues, acceptable land use intensities, concessions, and interpretive options, as well as the park's local, regional, and statewide significance. The Plan describes the kinds and levels of use expected for specific geographical areas (Management Areas) within the park. It lists overall management plans that may be required for specific uses or resources. Implementation of Plan proposals will occur in phases, as funding becomes available, and will be subject to additional environmental review.</p>	NOP	08/20/2001
2001071102	<p>Corona Civic Center Corona, City of Corona--Riverside</p> <p>The City of Corona is proposing the development of a new City Hall building at the existing Civic Center site located along Sixth Street between Vicentia Avenue and Buena Vista Avenue. The proposed project would centralize all City offices at the Civic Center, provide enough building space to serve the anticipated future population of the City, and provide room for the Police Department to expand. To do this, a modern 125,000 square foot (sf) City Hall building would be constructed in the area presently occupied by two baseball fields. The baseball fields and field lighting standards would be relocated to another park within the City. The Police Department would then expand into the existing City Hall building which would continue to house some administrative offices. The Public Works maintenance yard, purchasing department building, and the community center would be removed to provide new parking for 600 cars. In addition to the on-site improvements, the City is also proposing to extend Third Street from Vicentia Avenue to Grant Boulevard. The new extension would provide two lanes of travel within a 67-foot right-of-way.</p>	NOP	08/20/2001

2001071120	Oak Park/Mission Creek Bank Stabilization Santa Barbara, City of Santa Barbara--Santa Barbara The project consists of bank repair and stabilization of 300 linear feet at the northern site and 225 linear feet at the southern site of Mission Creek within Oak Park. The project involves returning the bank to its condition previous to the flood events in the 1998 winter storms. The proposed stabilization consists of compacted fill with a pyramat permanent erosion control geotextile mat placed on top of the compacted fill. The mat will be placed around existing vegetation. Rocks of various sizes, ranging from 2-ton to 1/4 ton, will be placed on top of the pyramat from the toe of the bank and up towards the easterly stream bank. At the toe of the bank, an erosion control blanket will be installed and will be hydroseeded. The northerly bank stabilization will require approximately 430 cubic yards of fill material including the rocks. The southerly bank stabilization will require approximately 605 cubic yards of fill material including the rocks. The project requires review and approval by the Architectural Review Board and Parks and Recreation Commission. The project also requires a building permit and a public works permit.	Neg	08/20/2001
2001071121	Hidden Valley Park/Arroyo Burro Creek Bank Repair Santa Barbara, City of Santa Barbara--Santa Barbara The project consists of bank repair and stabilization of 320 linear feet on the westerly bank of Arroyo Burro Creek within Hidden Valley Park. The project involves removing 320 linear feet of wire mesh fencing that has been severely damaged. The fencing will be replaced with new wire mesh. The poles that support the wire mesh will remain with exception for at least two of the poles that can no longer be used. An erosion control mat will be placed west of the wire mesh fencing. Willow cuttings will be placed at 5' at center behind the wire mesh fencing. The erosion control mat will be cut to allow for the willows to be planted. Existing willows will be removed but replaced with cuttings taken in the vicinity of Arroyo Burro Creek. No other existing native vegetation will have to be removed. The project will require 45 cubic yard of fill in the area of the eroded bank as well as installation of a hydroseed mixture to further stabilize the creek bank. The project requires review and approval by the Architectural Review Board and Parks and Recreation Commission. The project also requires a building permit and a	Neg	08/20/2001

The applicant proposes to construct 71 single family residence lots.	NOD	
1999092102	Lower Clear Creek Floodway Rehabilitation Project Western Shasta Resource Conservation District Redding--Shasta The subject project would complete stream channel and floodplain rehabilitation efforts in a 1.6 mile section of lower Clear Creek that has been severely degraded by gravel extraction activities. The project will improve salmonid habitat by filling old mining pits with gravel, reconstructing functional floodplains, restoring a properly sized stream channel that is in balance with future flow and sediment supply conditions, and restoring native woody riparian vegetation. Gravel and cobble necessary for rehabilitation efforts would be obtained from dredger tailings that are available within the lower Clear Creek watershed. Two borrow sites have been indentified for restoration actions and would provide a source of borrow material for rehabilitation actions at the project site. A third site provides wetland creation opportunities in an area previously degraded by mining activities. Floodplain restoration and off channel wetlands would be created, where appropriate, at each borrow site during removal of dredger tailing piles.	NOD	
2000062073	College Infill Apartments University of California, Santa Cruz Santa Cruz--Santa Cruz The project is the construction of infill apartments at three existing colleges on the UC Santa Cruz campus: Cowell College, Stevenson College, and Porter College. The project will construct a total of approximately 225,890 outside gross square feet of space. At Cowell College approximately 29 student apartments and support facilities will be provided in three 3- and 4-story buildings to be located on approximately 5.6 acres of land east of Hagar Drive and west of two existing Cowell College dormitories. Support facilities at Cowell will include a community room, a computer room, a mailroom, and laundry facilities. At Stevenson College, approximately 26 student apartments and support facilities will be provided in three 3-story buildings to be located on approximately 2.7 acres, immediately south of the college, on the site of an unused swimming pool. Support facilities at	NOD

	Stevenson will include a mailroom, laundry facilities, a computer room, and a music practice room. At Porter College, approximately 86 student apartments and support facilities will be constructed in seven 2-, 3-, and 4-story buildings located on approximately 4.8 acres between Porter College and Kresge College. Support facilities at Porter will include a mailroom, laundry facilities, a community room, and possibly a photo lab.		
2000092012	Veterinary Medicine Facilities Improvement University of California Davis--Yolo The proposed Veterinary Medicine 3A (Vet Med 3A) facility is designed to contain 90,635 assignable square feet of new construction and 5,455 assignable square feet of remodeled space in the existing Veterinary Medicine teaching Hospital. The total project area is 165,583 gross square feet. VEt Med 3A will include a five-story research tower and one-and two-story clinical and teaching laboratories.	NOD	
2000101059	Groundwater Storage, Banking, Exchange, Extraction and Conjunctive Use Program Rosedale-Rio Bravo Water Storage District Bakersfield--Kern The program consists of proposed projects that will increase groundwater supply within the Rosedale-Rio Bravo Water Storage District. Future projects include wells and pipelines to extract and convey banked water from the District's Goose Lake Slough and recharge basins to the Cross Valley Canal located in Kern County.	NOD	
2000101124	Artesia Redevelopment Project Area Artesia, City of Artesia--Los Angeles The proposed Project is the adoption of a new redevelopment plan for a project area known as the Artesia Redevelopment Project Area in accordance with the standards of the CRL, Health and Safety Code Section 33000, et seq. The purpose of the Redevelopment Plan is to eliminate the conditions of physical and economic blight that exist in the Project Area through revitalization and reuse of commercial, industrial and vacant properties. The total Project area encompasses approximately 245 acres. The Project conforms to the adopted Artesia General Plan. For the purpose of environmental analysis, buildout of the Project Area totaled a net increase of approximately 1.0 million square feet of commercial space, net decline of approximately 387,000 square feet of office space and a net increase of approximately 361,000 square feet of industrial space.	NOD	
2001021036	University Channel La Mesa, City of La Mesa--San Diego University Channel / Massachusetts Avenue and Boulevard Drive - A proposed restoration of an eroded earthen drainage channel. Portions of the northerly and southerly banks of the existing channel have eroded, creating a hazard for the abutting commercial building at 7167 University Avenue. The work consists of restoring eroded banks using approximately 1,480 square feet of riprap on both sides of the channel (0.034 acre of bank area to be repaired). Since the northern bank has more erosion and will be built-up with riprap, the southern bank will be	NOD

	cut to maintain the existing width of the streambed. Topsoil will be added over the riprap and sprayed with a hydroseed mix of native plants to stabilize the repaired banks. The earthen channel, commonly referred to as University Channel, is a tributary to Chollas Creek and is part of the Chollas Creek hydrological area (APN 474-160-08 and 474-160-11).		
2001042069	Science Lab Building and Lecture Hall Facilities (tiered from SCH # 1994022005) University of California, Davis Davis--Yolo The Science Laboratory Building project is comprised of two buildings: a three-story teaching laboratory building and a single-story lecture hall building. The combined facility (150,966 gross square feet) will provide modern class laboratories, laboratory service rooms, and instructional support spaces to meet current and planned instructional needs. The lecture hall will seat 500. The Laboratory Building will provide instructional space for the Division of Biological Sciences as well as the general campus.	NOD	
2001042079	Aurelius Way/Central Avenue Storm Drain Project Environmental Review and Assessment, Department of --Sacramento The proposed project consists of upgrading an existing storm drainage system by adding approximately 4,090 linear feet of storm drainpipe, 25 drainage inlet, 28 manhole and out-fall drain into Arcade Creek. Some temporary work easements and new drainage easements will be required where realignment occurs.	NOD	
2001051126	California Institute for Telecommunications and Information Technology University of California, Irvine Irvine--Orange The California Institute for Telecommunications and Information Technology ("Cal {IT}2") project is a research initiative focused on wireless communication sponsored by the State of California that will integrate the efforts of the University of California and the private sector. To facilitate this research, a new four-story building of approximately 120,000 gross square feet (68,600 assignable square feet {asf}) will be constructed on the University of California, Irvine campus. The Cal (IT)2 Research Facility will consist of 16,000 asf of specialized laboratory facilities, 46,080 asf of interdisciplinary dry research laboratories and offices, 4,600 asf of conference and public facilities, and 1,920 asf of administrative space. The project will be located in the Engineering Quadrangle of the campus, at the current location of parking lot 18A, and bounded by the Gateway Engineering Building to the east, East Peltason Drive to the south, and the University Club to the west.	NOD	
2001052120	Acquisition of Water from Western Canal Water District for Use in the 2001 Dry Year Water Purchase Program Water Resources, Department of Chico, Oroville--Glenn, Butte This initial study and proposed negative declaration address the potential environmental impacts of Western Canal Water District (WCWD) participating in the 2001 Dry Year Purchase Program. WCWD would provide 16,754 acre-feet of water to the Program by fallowing 5,077 acres of agricultural land currently in rice production. This water would be used by seven agencies that anticipate water	NOD

	shortages this year due to reductions in their entitlement allocations.		
2001078415	Page Residence Repairs and Stabilization to Sycamore Creek Banks Fish & Game #5 --Santa Barbara Repair of a 6 inch fire line, cable bridge, a 36 inch outfall pipe, and erosion control on the bank.	NOE	
2001078416	Agreement R4-042-00; Mr. Braddy Culvert Placement Fish & Game #4 -- The project will install 200 feet of 24-inch culvert with rock energy dissipater at each end. The project will place 4- to 6-inch cobble in several existing ditches and grade approximately 80 cubic yards of soil at the project site. Minimal repairs to an existing water bar will also be completed.	NOE	
2001078417	Replace Signals Caltrans #3 --Placer The project proposes to replace the existing signals. New poles will be installed within the existing right of way at a distance not exceeding 5 feet from the existing location. It is proposed to install new foundations, conduit and pull boxes, vehicle detector loops and two AC pads for pedestrian refuge at the southeast and southwest corners near the signal poles. No new right of way will be acquired. The project will offer relief to pedestrians and improved lighting location will benefit the motoring public.	NOE	
2001078418	Transfer of Coverage to El Dorado County APN 25-603-11 (McIntyre) Tahoe Conservancy --Alameda Project consists of the sale and transfer of 1,935 square feet of potential coverage rights from Conservancy-owned land to a receiving parcel on which a private residence will be constructed. The transfer enables the receiving landowner to carry out the project without any net increase in the amount of existing land coverage in the hydrologically-related area.	NOE	
2001078420	CDF Tree Grant-Strong Neighborhoods San Jose, City of --Riverside This project, to be carried out by the City of San Jose in partnership with Our City Forest, involves the planting and care of 1400 trees on the municipal grounds within the City of San Jose. It is anticipated that this project will commence in October of 2001 and be completed by March 2003. Trees will be non-native ornamentals that have been selected for their disease resistance, adaptation to the urban landscape, shade capacity, and minimal litter production. Trees will be planted from 15-gallon containers. All trees will be planted, staked and tied, watered and maintained in accordance with the California Department of Forestry and Fire Protection's tree planting guidelines.	NOE

	and authority to acquire all property in the added area.		
1989070302	Metropolitan Bakersfield 2010 General Plan Update EIR Kern County The Draft EIR will evaluate potential environmental impacts resulting from the following revisions to the Metropolitan Bakersfield 2010 General Plan, including but not limited to: 1) Deletion of redundant and/or completed policies, goals and programs; 2) Revision to maps, figures, text, charts and tables to reflect updated data/information; 3) Update of the City's land use database; 4) Update of the Kern Council of Governments (Kern COG) traffic model information; and 5) Revision to General Plan noise and air quality data based on the new traffic model.	NOP	08/23/2001
2001072100	Sutter County Feasibility Study Reclamation Board Yuba City, Live Oak--Sutter The Study will provide an evaluation of the existing flood management system and will develop potential measures that would reduce flood damages in the Study area while integrating opportunities for environmental restoration. A full range of structural and nontraditional flood damage reduction components will be considered. They will concentrate on problems associated with the main channels of the Sacramento River, Sutter Bypass, Feather River, and their associated floodplains. The final report will be an integrated feasibility report and joint EIS/EIR. The following measures are currently being considered for evaluation: strengthening and/or raising levees; backup and ring levees; levee realignments; upstream reservoir reoperation; improved or additional bypass channels; management of existing vegetation within floodways or on riverbanks; off stream temporary storage; channel dredging; and a change in the operations of and conveyance to State pumping plants along the east levee of the Sutter Bypass.	NOP	08/23/2001
2001072102	2001 Plumas County General Plan Summer Amendments (Sierra Pacific Industries) Plumas County --Plumas Immediate rezone to permit development of subject area as a rural residential subdivision.	NOP	08/23/2001
2001072105	Yuba City General Plan Yuba City Yuba City--Sutter The Yuba City General Plan Update will address all elements of a General Plan, consistent with State law. The Scope of Work for the project is attached. The current Yuba City General Plan, with the exception of the housing element, was adopted in 1989 and has not been significantly revised since. The plan covers about 70% of the sphere of influence. The text of the plan is essentially out of date and needs to be rewritten and expanded to address the entire sphere of influence. The City and its redevelopment agency have made a considerable effort in revitalizing its downtown, including the adoption of a specific plan for the greater downtown area. Even though that work is ongoing, it is not anticipated that the General Plan Update will include work specific to the downtown area, other than how it relates to the whole and provides policies encouraging infill development.	NOP	08/23/2001

2001072106	Spinetta Winery Process Wastewater Disposal Facility Electrical Permit Amador County Plymouth--Amador Electrical permit for a winery process wastewater disposal facility being constructed to collect and dispose of the effluent generated by the wine making process. The disposal facility consists of a collection system wherein the wastewater is clarified, then pumped to a constructed wetland and storage pond, and finally discharged to the surrounding land through irrigation.	Neg	08/23/2001
2001072107	Thomes Creek Rock, Inc., Thomes Creek Gravel Mining Operation-Shamba and Piedmont Project Sites Fish & Game #1 Corning--Tehama The project proponent is requesting to reactivate its Shamba site and also to extract material from the recently-purchased Piedmont site. The removal of gravel at the Shamba site will consist of hauling approximately 75,000 cubic yards of stockpiled material a distance of about one mile to the project proponent's existing facility and removing a smaller amount of material from the Creek. Work is scheduled to begin in September, 2001 and would be completed by October, 2001. Removal of gravel and other material from the Piedmont site is not expected to begin until July, 2002, and would involve the removal of approximately 15,000 cubic yards of material. The project proponent is currently permitted by the County (Use Permits No. 92-35 and 84-22) to remove up to 180,000 cubic yards of sand and gravel per year at the two sites, 150,000 cubic yards from the Shamba site and 30,000 cubic yards from the Piedmont site; however, these quantities have never been removed. All materials extracted will be processed and stockpiled at the project proponent's existing facility along the creek.	Neg	08/23/2001
1992013033	Gravel Removal From Lower Eel River in Humboldt County Humboldt County Eureka--Humboldt, Mendocino The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1603 of the Fish and Game Code to the project applicant, Mr. Walt Dragaloski representing Mercer Fraser Company. The applicant proposes gravel extraction for commercial purposes on the South Fork of the Eel River, (Cooks Valley), Humboldt and Mendocino Counties.	NOD

1992083049	The Surface Mining of Sand and Gravel on the Mad River Humboldt County --Humboldt The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1603 of the Fish and Game Code to the project applicant, Mr. Bob King representing Redwood Empire Aggregates. The applicant proposes to commercially extract gravel from the Emmerson Bar on the Mad River, Humboldt County, in accordance to the recommendations of the County of Humboldt Extraction Review Team during 2001.	NOD	
1992083049	The Surface Mining of Sand and Gravel on the Mad River Humboldt County --Humboldt The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1603 of the Fish and Game Code to the project applicant, Mr. Bob King representing Redwood Empire Aggregates. The applicant proposes to commercially extract gravel from the Blue Lake Bar on the Mad River, Humboldt County, in accordance to the recommendations of the County of Humboldt Extraction Review Team during 2001.	NOD	
1999031014	McGrath State Beach Levee Replacement Parks and Recreation, Department of Oxnard--Ventura Replace earthen levee adjacent to the Santa Clara River with a berm located several hundred yards away from the river's edge along an existing campground perimeter road within McGrath State Beach. The existing levee, constructed during the 1950's, was partially destroyed in 1998 flood events. The proposed set back levee/berm would be three feet high and would be planted with vegetation native to the locale. It would run the entire 1080 foot distance of the existing road between the campground and the salt marsh of the Santa Clara River Estuary Natural Preserve.	NOD	
2000042076	SAA #00-0474, Installation of a Series of Large Wood & Boulder Structures for the Purpose of Gravel Recruitment and Habitat Improvements to Grizzly Creek Fish & Game HQ --Humboldt The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1601 of the Fish and Game Code to the project applicant, Ms. Ann Glubczynski representing the Humboldt County Public Works Department. Applicant proposes the replacement of an existing culvert with a natural creek bed flowline on Clear Creek, a tributary of the Mattole River, Humboldt County.	NOD

2001072110	<p>23rd Street and Valdez Street Mixed Use Project Oakland, City of Oakland--Alameda</p> <p>Lakeshore Partners proposes to construct 237 residential units over a 500-space parking structure on a site which currently contains a 250-space public parking lot. The project would include an 18-story tower building and a 7-story mid-rise building. One-half of the parking spaces (250 spaces) would be located within a self-park public parking garage and the remainder would be private residential parking spaces. The project would include 5,000 square feet of ground floor commercial uses along the 23rd Street and/or Valdez Street frontages. The site is located in an area of Downtown referred to as the Valdez district, which is adjacent to the Lake Merritt office district of Downtown Oakland. The Valdez district around the project site contains a diverse mixture of urban land uses including auto repair businesses, parking lots, parking structures, a YMCA building with recreational facilities and a public parking structure, residential uses, office uses, and restaurants. The proposed development is consistent with the General Plan land use designation for the site, which is Urban Residential. Construction of the proposed project would require a Major Conditional Use Permit and Design Review approval.</p>	NOP	08/24/2001
2001031044	<p>San Joaquin Rail Corridor Capacity Improvement Project Caltrans #6 Hanford--Kings</p> <p>The proposal is to install a second track from Guernsey to Shirley to enhance track efficiency within the San Joaquin Rail Corridor. This project will include installing fill adjacent to the existing track; installing the second track over the whole alignment; installing new sidings where needed; upgrading and replacing existing signal systems; and purchase of about 20 acres of new right-of-way along the 14.84 mile alignment.</p>	Neg	08/24/2001

2001072108	City Initiated Second and Third Street Rezone Anderson, City of Anderson--Shasta This is a proposed Mitigated Negative Declaration, Rezone, and Environmental Determination to accommodate a 1991 General Plan Policy that designated the area between Second and Third Streets between the Fairgrounds and the ACID Canal as an area that was set aside to accommodate low-density residential.	Neg	08/24/2001
2001072109	Laguna Stonelake Community Park Elk Grove Community Services District Elk Grove--Sacramento The proposed project is a 21-acre park located in the Laguna Stonelake Community in Sacramento County. The park would include a lighted Babe Ruth Baseball field with soccer overlay, a lighted soccer field, a softball field with soccer overlay, a tot lot with shade structure, a picnic area with shade structure, an approximately 675-square-foot restroom facility, a 150-space parking lot, turf, trees, and landscaping. The park would be operated on a turn-key basis in accordance with a development agreement between the developer (AKT Development Corporation) and the Elk Grove Community Services District.	Neg	08/24/2001
2001082013	Unitrans Maintenance Facility Expansion Project (Tiered from SCH# 1994022005) University of California Davis--Yolo The University of California, Davis (UC Davis) proposes to remodel and expand the Unitrans Bus Maintenance Facility located in the central campus east of Garrod Drive, south of La Rue Road, west of the Fleet Services Central Garage, and north of the UC Davis Arboretum. Unitrans is a student-run bus system that provides transportation for the campus population and the local community. The Unitrans Maintenance Facility Expansion Project would renovate the existing approximately 6,085 gross square feet maintenance building, add approximately 9,860 gross square feet of new enclosed building space, and expand the facility by approximately 0.5 acre to improve circulation and increase parking space. In addition, the project would make the following improvements within the approximately 3.8-acre project area: relocate the chassis wash, provide protective overhangs over the fueling and service area and the relocated chassis wash, upgrade the diesel fueling equipment's security system, upgrade utility connections, and provide additional landscaping along the expanded facility's western and southern sides.	Neg	08/24/2001

1996031039	Agreement Regarding Proposed Stream Alteration (SAA#5-049-99) for the Middle Segment of State Route (SR-56) Fish & Game #5 San Diego--San Diego Council approval of funding and right-of-way acquisition.	NOD	
2000032065	Vintage Greens Subdivision Windsor, City of Windsor--Sonoma The project relating to California Department of Fish and Game consists of constructing a pipeline undercrossing of Windsor Creek using jack and bore methods. A new 16-inch reclaimed water main will be constructed from Windsor Road just south of Windsor Creek to an existing main in the service road along the north side of Windsor Creek. The bore pit will be constructed outside the creek corridor along Windsor Road; the receiving pit will be on the north side of the creek in the existing service road. Windsor Creek, including the immediate project location, supports a small population of steelhead trout. A few coho salmon have been found in the creek, but it is not known if the stream actually supports a spawning run. Windsor Creek is within the range of the California freshwater shrimp and none have been found elsewhere in Windsor Creek. The general project area along Windsor Creek supports a dense strand of riparian vegetation, but the specific areas where the inlet and outlet structures will be located are dominated by blackberry and acacia. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number R3-2001-0494 pursuant to Section 1603 of the Fish and Game Code to the project operator, Phil Trowbridge/Demada, LLC.	NOD	
2001022022	Application To Appropriate Water No. 30974 State Water Resources Control Board, Division of Water Rights Sacramento--Sacramento Prior to submitting Application 30974, the Applicant built a 180-foot-long by 12-foot-tall earth fill dam for an onstream reservoir with a net capacity of 14 acre-feet. Water is to be diverted only during the season of collection, November 1 to March 15. The property is located in Lake County, approximately 10 miles northwest of Clear Lake. The project is described as a recreational and stockwatering pond.	NOD	
2001031076	El Toro Water District R-6 Reservoir Joint Use Improvement Project El Toro Water District Mission Viejo--Orange The R-6 Reservoir, which was constructed in 1967, is a large potable water reservoir owned, operated and maintained by the District within the City of Mission Viejo. The R-6 Reservoir Joint Use Improvement Project (Project) is a regional water supply reliability project being sponsored jointly by the District, Santa Margarita Water District and Moulton Niguel Water District. The benefits of the project include improving emergency water reserves by increasing reservoir storage capacity in south Orange County. The regional nature of the project enhances the availability of stored potable water in an area of critical need to meet existing emergency water reserve demands for each sponsoring agency's respective service area. Other than through the provision of additional emergency storage capacity, the Project is neither designed nor intended to increase	NOD

	operational capacity beyond pre-project levels.		
2001051030	Moreno Valley Regional Water Reclamation Facility Tertiary Treatment Expansion Project Eastern Municipal Water District --Riverside The Eastern Municipal Water District Moreno Valley Regional Water Reclamation Facility (MVRWRF) collects and treats municipal sewage, eventually reclaiming wastewater for reuse. The MVRWRF provides secondary and tertiary levels of wastewater treatment, with tertiary being the higher level allowing for reuse for any purpose other than direct human consumption.	NOD	
2001051036	New Exit Road - West Miramar Landfill San Diego, City of --San Diego Construction of a 24 foot wide, 2,700 foot long, paved access road (mostly over existing dirt road) for empty city trash trucks to exit the City's West Miramar Landfill and to access I-805. This proposal would bypass the main access at Convoy and SR52, thereby, saving 6 miles per trip.	NOD	
2001051099	North Coast Church Vista, City of Vista--San Diego The proposed project consists of a General Plan Amendment, Zone Change, and Special Use Permit to develop a church facility and office building, including all associated site improvements, on a 40.6-acre site located at the northwest corner of North Santa Fe Avenue and Osborne Street.	NOD	
2001079060	Tiburon Creek Subdivision Napa, City of Napa--Napa In order to drain a portion of lots 1, 7 and 12, installation of a closed conduit drainage system consisting of one 4 inch pipe and outfall structure will be in each lot going from the house to the creek. The total area of creek bank encompassed by the aforementioned six lots is approximately 160 linear feet. The area of each drain outlet structure will be approximately 3 feet long by 18 inches deep or approximately 9 square feet. The outfall structure will be constructed with 4-6 inch clean river rock. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number pursuant to Section 1603 of the Fish and Game Code to the project operator, Dean Mills, O'Brien Group.	NOD	
2001079061	Kunz Minor Subdivision Concord, City of Concord--Contra Costa As part of the development of a 1.8 acre site into a 4 lot subdivision, the operator proposes to install 2 sewer pipes under the bed and an outfall structure on the south bank of Galindo Creek, behind the residence at 1039 Ridge Park Court in Concord, Contra Costa County. An 8 inch and a 6 inch sewer pipe will be installed approximately 3-4 feet below the existing creek bed surrounded by 5 cubic yards of concrete. Loose rock riprap will be placed approximately 1' below the existing creek bed over the concrete protected pipes, and 3 linear feet upstream and no more than 15 linear feet downstream of the pipes. Twelve inches of salvaged bed	NOD

	material will be used to backfill over the riprap. Approximately 10' upstream of the sewer pipes, an 18 inch storm drainpipe will outfall on to the south bank using the county standard B-50 plan, utilizing riprap. The total linear feet of impact due to the sewer pipes is approximately 22 feet. The project location is the south bank of Galindo Creek, behind the residence at 1039 Ridge Park Court in Concord, Contra Costa County. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 2001-0433 pursuant to Section 1603 of the Fish and Game Code to the project operator, William Kunz.		
2001079062	Water Hole Construction, Stream Crossing and In-Channel Diversion Fish & Game #2 --El Dorado The California Department of Fish and Game is executing a Lake or Streambed Alteration Agreement Number R2-2001-211 pursuant to Section 1603 of the Fish and Game Code to the project applicant, Sierra Pacific Industries, represented by Robert Little. The project consists of constructing a water hole, realigning a stream, installing a rocked rolling dip, enlarging an existing water hole, and partially impounding water to facilitate diversion.	NOD	
2001079063	Montis Niger Gas Pipeline Interconnect Project Fish & Game #2 --Sutter The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number R2-2001-20 pursuant to section 1603 of the Fish and Game Code to the project applicant, Calpine Natural Gas Company of Folsom. This agreement pertains to horizontal directional drilling technology used to install a 9-inch diameter gas pipeline by boring underneath the Greenleaf 1 Drainage Canal. Where feasible, bore entry and exit pits will be located over 50 feet away from the edge of the drainage canal. The Streambed Alteration Agreement includes avoidance and contingency measures to avoid significant adverse impacts to fish and wildlife resources. The California Energy Commission prepared a CEQA equivalent document for this project, which is part of the "Sutter Power Project," in 1999.	NOD	
2001078484	Washington Ridge Water Well Project Forestry and Fire Protection, Department of --Nevada Establish a well for the Washington Ridge Conservation Camp. The site is at the original water source for the camp when the camp was built in 1961. The original site consists of 32 concrete water tanks approximately 5 feet tall and 6 feet in diameter. There is an existing pilot well at this location. It is lined with well casing and capped. The project will entail drilling a new well within 25 feet of the old pilot well. Impacts will only be to the area of the well drilling (approximately 12 inch in diameter).	NOE	
2001078485	Trinidad Resource Management Building Expansion Forestry and Fire Protection, Department of Trinidad--Humboldt The project consists of the expansion of the existing Resource Management Office located at the Trinidad Fire Station. The project involves expanding the current building an additional 14 feet to the east for a total addition of 336 square feet.	NOE

	The new addition will be used as office space for two new staff members, as the current office space is not sufficient. The construction will also encompass the building of two interior walls within the present structure to add an extra office. The proposed building site is currently a lawn. Clearing of grass will be the extent of excavation needed to create the foundation for the proposed construction.		
2001078486	Diamond Bar Golf Course/U.S.G.S. San Dimas Quadrangle Fish & Game #5 Diamond Bar--Los Angeles The project involves approximately 43,300 square and 1,120 linear feet of construction on a 174-acre parcel. Areas eroded by the El Nino rains and the areas of the blue-line stream that have been adversely impacted by the imported rocks require reconstruction. Project plans have been prepared to regrade areas in and adjacent to the blue-line stream on the 1st and 8th fairways and the driving range; this project also proposes to divert the incidental water that runs across the driving range into a pipeline that will bypass the current flow line of the stream while leaving a grassed channel to carry stormwater runoff. Portions of the 1st and 8th fairways and the driving range would be regraded to a maximum 4:1 slope with a concrete "V" drain at the flow line to carry the incidental water across the aforementioned portions of the course and reduce the impact that golf carts and ball retrieval machines currently impact on the stream. The water that crosses the golf course in the summer and fall is generated by the irrigation system on the course, and is expected to continue running across the course after implementation of the regrading and "V" drains. Ultimately, the reconstruction project will allow golfers and course maintenance personnel to traverse the stream with less impact to adjacent soil and vegetation.	NOE	
2001078487	Stream Restoration Fish & Game #2 --Amador Restoring 700 feet of creek channel and repair of erosion damage to bank, including revegetation.	NOE

2001078490	Repair, Replacement, and Maintenance of Portion of Santa Ynez Extension Water Pipeline Central Coast Water Authority --Santa Barbara Repair, replacement, and minor relocation of approximately 900 linear feet of existing water pipeline (and appurtenances) that has experienced loss of integrity due to erosion and other geological failures.	NOE	
2001078491	Residence Fence & Concrete Patio (00/01-IE-30) Parks and Recreation, Department of --Riverside Project consists of inserting approximately 110 feet of a 6 foot high fence and 10 yards concrete for a patio area, behind the existing Ranger residence.	NOE	
2001078492	SFPP Line Section 25 Pipeline Repair Project Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland --Solano, Contra Costa SFPP L.P. operating partnership for Kinder Morgan Energy Partners, L.P. has proposed to inspect and repair a petroleum pipeline at 28 dig sites located in the Suisun Marsh, Solano County and in the City of Pittsburg, Contra Costa County. The inspection and repair of the pipeline will result in the temporary impact of 0.68 acres of jurisdictional wetlands and waters. The actual excavation will be about 10 feet by 20 feet at each dig site.	NOE	
2001078493	Storm Drain Outfall Installation Project Fish & Game #3 Healdsburg--Sonoma The project consists of removing berry bushes and installing a storm drain outlet with an energy dissipater which will consist of a rip-rap mat. The pipe to be used is a 12-inch ADS and the rip-rap will extend to the top of the stream bank. Berry bushes will be removed and minor excavation will be done to provide a base to install the rip-rap. No equipment will operate within the stream channel. The work area is 10 feet wide by 30 feet long. Issuance of a Streambed Alteration Agreement Number R3-2001-0482 pursuant to Fish and Game Code Section 1603.	NOE	
2001078494	Culvert Replacement Fish & Game #3 --Monterey The project is proposed on an unnamed creek, tributary to the Big Sur River, located approximately 3.5 kilometers north of Big Sur River Bridge on Highway 1, at KP 78.5, Monterey County. The work involves the excavation of the existing roadway (Highway 1) and the removal of an existing culvert which cannot handle the current amount of water flow and leaks due to old age and corrosion. The existing culvert and headwall will be removed and two new 36 inch reinforced concrete culverts will be installed and a new head wall constructed. These new culverts are expected to handle the water flow which is seasonal runoff from a gully and the roadway. When the water exits the culvert it flows down the bank and into the Big Sur River.	NOE

2001078495	Creston Drive Outfall Pipe Replacement Fish & Game #3 Cupertino--Santa Clara The project consists of the replacement of a 24-inch corrugated metal pipe on Creston Drive near Alderney. The work to be performed involves removal of the existing corroded metal pipe at the backyard of 10582 Creston Drive and installing a new pipe. Concrete sacked rip rap will be installed at the outfall to prevent erosion. Issuance of a Streambed Alteration Agreement Number R3-2000-1332 pursuant to Fish and Game Code Section 1601.	NOE	
2001078496	Culvert Extension Fish & Game #3 Saratoga--Santa Clara Extension of existing culvert. Revegetate and enhance remaining 160 feet of tributary. Issuance of a Streambed Alteration Agreement Number R3-2000-1069 pursuant to Fish and Game Code Section 1603.	NOE	
2001078497	Sediment Removal and Culvert Installation Project Fish & Game #3 --San Luis Obispo This project consists of removing approximately one cubic yard of sediment from Dughi Spring at the spring source, and approximately six cubic yards of sediment from a cement-lined pond approximately 30 feet south of the spring source. Approximately 586 cubic yards of sediment and wetland vegetation would be removed from Mucky Pond. The project would also replace two culverts crossing Dughi Spring Road and one culvert crossing Primera Mine Road. At each of the three culvert locations, the channel would be lined with 10 linear feet of rock slope protection at the inflow end of the culvert and 40 linear feet of rock slope protection at the outflow end. The equipment to be used for the project includes a bulldozer, backhoe, excavator, loader, and grader. Issuance of a Streambed Alteration Agreement Number R3-2000-1429 pursuant to Fish and Game Code Section 1601.	NOE	
2001078498	Highway 41 Widening Fish & Game #3 --San Luis Obispo The California Department of Transportation is proposing to realign a section of Highway 41 approximately 4 miles east of the intersection of Highways 41 and 46, Post mile 47.5-47.7, in San Luis Obispo County. The northern side of the shoulder at this location is to be filled to the height of the current roadway. To accommodate the new fill, the existing 900-mm culvert conveying an unnamed drainage under the roadway will need to be extended nine meters. The extension will result in the loss of approximately 60 square feet of wetland area. To mitigate this loss, the widened channel upstream from the new culvert inlet will be revegetated with native plant species. Issuance of a Streambed Alteration Agreement Number 2001-0247 pursuant to Fish and Game Code Section 1601.	NOE

2001078526	Repave Sector Office Service Road and Parking Parks and Recreation, Department of --Mendocino Repave existing service road and parking areas for Mendocino Sector Office at Russian Gulch State Park. Roots will be ramped over with a leveling course of asphalt concrete and potholes repaired. Pavement reinforcing fabric may be installed in some areas. Road and parking areas will be restriped; handicapped parking stalls will be designated per ADA requirements. All work will occur within the existing footprint of roads and parking.	NOE	
2001078527	Resource Inventory (Fish) - Delta Meadows River Park Parks and Recreation, Department of --Sacramento Survey fish in Locke, Meadow, and Snodgrass Sloughs in Delta Meadows River Park at Brannan Island State Recreation Area to determine species, population distribution, and health. Work will done by UC Davis, under the Delta Keeper Program. Electroshocking and beach seining methods will be used to determine fish species and population. Although some fish may die as a result of the methods used during capture (including Delta Smelt), the Department of Fish and Game has issued the requisite permits and deems the loss as a less-than-significant impact. No fish will be kept.	NOE	
2001078528	Removal of Spoil Parks and Recreation, Department of --Sonoma Remove dirt pile near Lake Ilanjo. Material will be spread onto adjacent roadway.	NOE	
2001078529	Exotic Plant Removal Parks and Recreation, Department of --Sonoma Remove exotic plant species from rare plant habitats by hand removal spraying.	NOE	
2001078530	Celestial Roof Bat House Parks and Recreation, Department of --San Luis Obispo Install two bat houses in the roof structure over the Celestial Suite. These being installed as mitigation for disturbance of bat roost during roof repairs.	NOE	
2001078531	Main Terrace Tile Deck Rehabilitation Parks and Recreation, Department of --San Luis Obispo Repair damaged tile and concrete panels on the Main Terrace. The project also includes repair and addition of expansion joints, and minor improvements to drainage to eliminate ponding on the deck surface. Paver tiles will be replaced only as needed with matching reproductions.	NOE	
2001078532	Trail Signs Parks and Recreation, Department of --Placer Install interpretive signs for a self guided nature trail along the existing Codfish Trail.	NOE

2001071149	Picayune Rancheria of the Chukchansi Indians Casino National Indian Gaming Commission --Madera The proposed project is the development of 296,000 square-foot gaming and entertainment facility on approximately 48.53 Acres of Reservation Lands. The completed facility will house approximately 52,000 square feet of gaming area, a 200 room hotel, restaurants, entertainment facility, gift shop and casino administrative space. Associated parking, road improvements, water treatment and water facilities are also to be constructed.	EA	08/30/2001
2001071146	1777 East 20th Street High School/GTE North Property Long Beach Unified School District Signal Hill--Los Angeles Construction of a new 11/12 grade satellite high school facility. The addition of 11 classrooms, 1 administration building, on site parking, and a grass area for expansion. Accommodate up to 350 students. Students will also attend the Long Beach City College Pacific Coast Campus. Students will park at the City College or take public transportation to the new high school. The project will involve demolition and removal of some currently vacant GTE buildings on site.	EIR	09/13/2001
2001071145	Lowe's Home Improvement Warehouse Vista, City of Vista--San Diego The project proposes demolition of an existing church facility and a 56-unit apartment complex and development of a Lowe's Home Improvement Warehouse and garden center totalling 160,272 square feet, paved parking, landscaping, and associated site improvements. One alternative to the project is analyzed, which includes demolition of two separate apartment buildings on the site.	Neg	08/29/2001
2001071147	Initial Study #01-0049 Desert Valley Company Final Closure/Post Closure Maintenance Plan Imperial County Planning Department Westmorland--Imperial Desert Valley Company (DVC) has two open landfill cells (Cells I and II) which share a long berm at the Monofill Facility. The original closure plan for these cells proposed separate closure with a depression between the cells. In the recent construction of Cell II, it became apparent that the space or depression between the cells could be put to beneficial use. DVC proposes to utilize this space by taking the following steps: 1. Tie (connect) the liner systems of both cells together. This step includes replacement of some of the berm with a clay liner and connecting the high density polyethylene (HDPE) and leachate collection systems together. This activity could occur once Cell II has filled up to the proposed berm height so that there is no undue stress placed on the liner system. 2. Fill the space between the two cells with geothermal materials. 3. Close both cells as one unit.	Neg	08/29/2001

An addendum to the March 20, 2001 Initial Study was filed changing the source and quantity of the 5,000 acre-feet of Tulare Irrigation District water from section 215 water to rescheduled Class I water. The water will be used for the CALFED Environmental Water Account for fishery protection.	NOD	
2001042118	Industrial Tract Stream Environment Zone Restoration South Lake Tahoe, City of South Lake Tahoe--El Dorado The project proposes to remove 400 feet of Industrial Avenue or approximately 14,800 square feet of land coverage in an SEZ, including the asphalt and the concrete curb, and constructing a cul-de-sac. Surface flow which is currently carried in an 18-inch culvert under Industrial Avenue will be brought to the surface and spread out over the restored surface. In addition, the SEZ restoration will be enhanced by redirecting 20.8 cubic square feet into the restoration area from a vegetated channel which discharges to the Tahoe Valley Watershed Erosion Control Project. This will improve both the SEZ function in the Industrial Tract as well as in the Tahoe Valley Project by creating a better balance between runoff flow and treatment capacity.	NOD	
2001051075	Barstow Sanitary Landfill/SWFP Amendment San Bernardino County Land Use Services Department Barstow--San Bernardino Barstow Sanitary Landfill/Solid Waste Facilities Permit Amendment.	NOD

2001078583	Ramada Repairs Parks and Recreation, Department of --Tuolumne Replace posts, rafters, joist, and roofing of a snow-damaged shade ramada to allow public use.	NOE	
2001078584	Molinari Acquisition Parks and Recreation, Department of --San Luis Obispo Acquire 178 acres on the northern boundary of the State Park.	NOE	
2001078585	New Well Parks and Recreation, Department of Trinidad--Humboldt This project proposes to drill a new well for Patrick's Point Campground.	NOE	
2001078586	License for Access to Perform Soil Boring Tahoe Conservancy --El Dorado Execution of a one-day license agreement with the South Tahoe Public Utility District for the purpose of obtaining soil samples to determine if hydrocarbons are present in the soil, as required by the El Dorado County Environmental Health Department.	NOE	
2001078587	Acquisition of a Conservation Easement Over One Environmentally Sensitive Parcel for Protection of the Natural Environment Tahoe Conservancy --El Dorado Purchase of less-than-fee interest in one environmentally sensitive parcel for the protection of the natural environment as part of the California Tahoe Conservancy's land acquisition program.	NOE	
2001078588	Soil and Groundwater Contamination Corrections, Department of Tracy--San Joaquin This project will dispose of remediated groundwater from the excavated pit area by using a temporary submersible pump to pump untreated water from the pit through a carbon filter system into a tanker truck equipped with spray nozzles. The truck will transport the water to an onsite 22-acre location north of the soil remediation area and spray the approximately 22,000 gallons/day of remediated groundwater over the non-permeable pre-plated field for evaporation of the remediated water. This site is highly disturbed due to the previous use as an open burning pit and will not affect any sensitive biological resources.	NOE	
2001078589	Acquisition of up to Three Environmentally Sensitive Parcels Necessary for the Protection of the Natural Environment Tahoe Conservancy --El Dorado, Placer Purchase of fee interest in up to three environmentally sensitive parcels or parcels necessary for the protection of the natural environment as part of the California Tahoe Conservancy's land acquisition program.	NOE
